

Exhaust Gas Cleaning System (EGCS)

- ① Wet Scrubber(Photo1)
- ② Laser Gas Analyzer for SO₂ and CO₂(Photo2)

EGCS is an alternative for SO_x regulatory compliance. Our EGCS could consist of wet scrubber and electrostatic precipitator. Compact size facilitates retrofitting and installation in new ships. The analyzer continuously monitors SO₂ and CO₂ concentrations which are requested to measure in the EGCS Guideline. It can be installed on exhaust gas pipes because it is small enough in size.
