## Gas Combustion Unit for LNG Fueled vessel "MECS-GCU"

This system "MECS-GCU" can process Boil Off Gas(BOG) in the range from 250kW to 2400kW for LNG Fueled vessels which are expected to increase.

This system safely incinerates and processes BOG or Gas vaporized when bunkering on LNG Fueled vessels. When docking a LNG Fueled vessel, combustible gas in the fuel tank should be incinerated and replaced to inert gas. This system can incinerate various BOG consisting of CH<sub>4</sub> or inert gas.
