### 6EYG26L

Marine Gas Engine 6EYG26L has 25% reduction of the CO<sub>2</sub> emission in the propulsion system by adopting new technology against fluctuation of propulsion load and fuel calorific.

#### ~ Features ~

- NOx level to clear IMO Tier 3 regulation by the lean-burn technology.
- Technology dealing with the fuel composition variation at the natural gas-producing countries.
- The air-fuel ratio control technology by the load fluctuation prediction.
- Knocking detection and avoidance technology.
