MAP (Mitsubishi Advanced Propeller) Mark-W Propeller

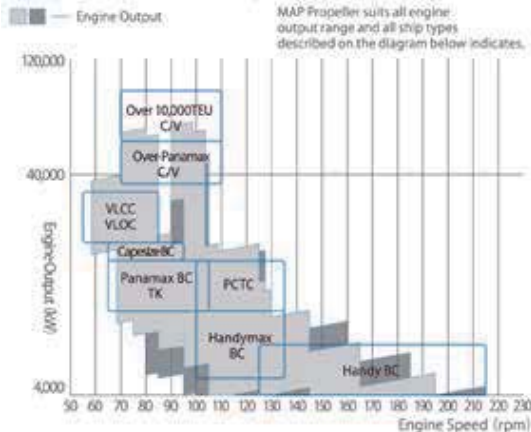

Improvement of the tip shape enhanced the efficiency of MAP Mark-W propellers while keeping cavitation performance levels virtually unaffected. These propellers can be tailored so suit slow-steaming needs and are also ideal for retrofitting existing propulsion systems.

(Features)

- Economical
 - High propulsion efficiency
- Highly reliable
 - Maintains excellent propeller strength
- Excellent cavitation performance with streamlined tips and reduced blade area
- Compact design
 - Lower propeller mass and inertia moment

Compatibility of MAP Propeller
