Mooring Chain & Anchor Chain

Stud Link Mooring Chain & Studless Link Mooring Chain Grade R3, R3S, R4,R4S & R5 for Offshore

Stud Link Anchor Chain Grade G2 & G3 for Ships

We were the first in Asia to introduce a Swedish flash butt welder in 1957 and today we are one of the world's foremost manufacturers of not only R4 and R5 grade ultra-strong chain for offshore applications, but also chain that surpasses these standards and is designed for use in even harsher environments.

The many years of chain manufacturing experience and the feedback that HAMANAKA CHAIN is constantly receiving from customers have been invaluable in the research and development of the steel materials used in chain manufacturing that has been carried out in conjunction with Nippon Steel & Sumitomo Metal Corp., which has many years of steel-manufacturing expertise. The resulting steel, which is used in the manufacture of R5 chain, is the fruit of much hard work carried out by researchers in both companies.

After-sales service

Head Office : Ko-770, Shirahama-cho, Himeji 672-8023, Japan

TEL: +81-79-245-5151 FAX: +81-79-246-0270
