

GATE RUDDER SYSTEM

by KAMOME PROPELLER

Steer to the new era

Completely new concept rudder creating the thrust
The GATE RUDDER® consists of two uniquely shaped rudders placed in parallel either side of the propeller instead of placing behind the propeller, which reduces resistance of rudder and creates thrust to improve the energy consumption.

ADVANTAGE

- Confirming 14% Energy Saving on actual ship.
- Excellent course keeping and turning performance.
- Less noise and Underwater Radiated Noise (URN).
