

Auto Pilot / Eco Operation Saving Course System (ACE)

Model : PR-3000

Saving Energy and Course using Tokyo Keiki Auto Pilot

PR-3000 Auto Pilot

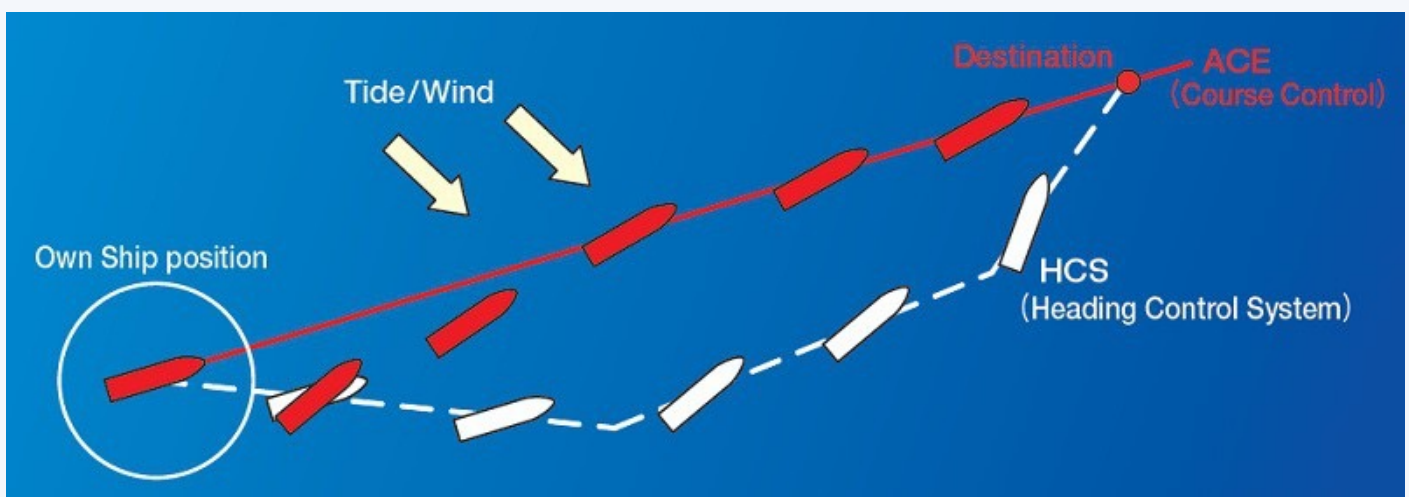

PRODUCT OVERVIEW

Tokyo Keiki Auto Pilot is advanced equipment to control ships. Up until now, only one sensor was used for Auto Pilot — either Gyro Compass or GPS. With the PR-3000, both sensors work together, enabling the ship to keep its set course far more accurately. For fuel-conscious operators, choose Tokyo Keiki Auto Pilot.
